

PUBLIC NOTICE

The Somerset County Sanitary District will be monitoring the Princess Anne Water System and the Fairmount, Rumbley & Frenchtown Water System for Lead and Copper in September 2017.

If you are interested in having the water in your home monitored for Lead and Copper and your home meets one of the following Criteria, call Earl Ludy at 410-651-0268 or contact him by email at eludy@somersetmd.us.

1. Single Family home built after 1982 with copper pipes.
2. Multiple Family structure built after 1982 with copper pipes.
3. Single Family home built prior to 1983 with copper pipes.

Lead and Copper Monitoring cannot be done on homes with on-site water treatment systems installed.

For details about the Lead and Copper Monitoring program and participating in the program call Earl Ludy at 410-651-0268 or contact him by email at eludy@somersetmd.us.
